Excerpt from How to Write for the Press: A Practical Handbook for Beginners in Journalism So numerous are the handbooks on practical journalism and authorship that the addition of yet another to the list may seem to call for a few words of explanation, if not apology. By way of this, I would state, in the first place, that the majority of such works have been written by men whose success in the realm to which they have posed as guides has been somewhat equivocal. That is to say, men whose connection with journalism has been of the very slightest nature, men who have had no real experience of practical newspaper work, have taken upon themselves the office of giving advice to others when they themselves stood much in need of it. It is quite unnecessary to mention names in this connection, as experienced journalists are well aware of the facts. Now, for a man who has not spent years in going through the daily work of a practical journalist, and has some difficulty in getting his own contributions accepted, to offer his wisdom and counsel to the beginner in journalism is nothing less than an impertinence. The bald-headed barber who urges you to buy his hair restorer and the individual in question are near relatives.
