

Operators, Functions, and Systems: Hardy, Hankel, and Toeplitz Volume 1: An Easy Reading

Filesize: 5.94 MB

Reviews

Comprehensive guide for pdf fanatics. Sure, it really is play, nevertheless an interesting and amazing literature. I discovered this publication from my dad and i suggested this ebook to learn.
(Ms. Isobel Rosenbaum I)

OPERATORS, FUNCTIONS, AND SYSTEMS: HARDY, HANKEL, AND TOEPLITZ VOLUME 1: AN EASY READING

DOWNLOAD

American Mathematical Society, United States, 2009. Paperback. Book Condition: New. 251 x 170 mm. Language: English . Brand New Book. Together with the companion volume by the same author, Operators, Functions, and Systems: An Easy Reading. Volume 2: Model Operators and Systems, Mathematical Surveys and Monographs, Vol. 93, AMS, 2002, this unique work combines four major topics of modern analysis and its applications: A. Hardy classes of holomorphic functions; B. Spectral theory of Hankel and Toeplitz operators; C. Function models for linear operators and free interpolations; and D. Infinite-dimensional system theory and signal processing. This volume contains Parts A and B. Hardy classes of holomorphic functions is known to be the most powerful tool in complex analysis for a variety of applications, starting with Fourier series, through the Riemann ζ -function, all the way to Wiener's theory of signal processing. Spectral theory of Hankel and Toeplitz operators becomes the supporting pillar for a large part of harmonic and complex analysis and for many of their applications. In this book, moment problems, Nevanlinna-Pick and Caratheodory interpolation, and the best rational approximations are considered to illustrate the power of Hankel and Toeplitz operators. The book is geared toward a wide audience of readers, from graduate students to professional mathematicians, interested in operator theory and functions of a complex variable. The two volumes develop an elementary approach while retaining an expert level that can be applied in advanced analysis and selected applications. Table of Contents: An invitation to Hardy classes/Contents: Foreword to Part A; Invariant subspaces of $L^2(\mu)$; First applications; H^p classes. Canonical factorization; Szegő infimum, and generalized Phragmen-Lindelöf principle; Harmonic analysis in $L^2(\mathbb{H}, \mu)$; Transfer to the half-plane; Time-invariant filtering; Distance formulae and zeros of the Riemann ζ -function. Hankel and Toeplitz operators/Contents: Foreword to Part B; Hankel operators...
