Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .by the furnace is greatly improved. This elimination of surges and small unbalanced load given when automatic regulators are used should allow a motor load to be taken satisfactorily from a feeder that is also supplying electric furnaces. Mr. Dellplain: This subject is now open for general discussion, although we have about used up our time. If any one has a concrete answer to give in a very few words, we would like to hear from him at this time. W. E. Moore, Pittsburgh: As a rule ferro alloys aside from ferro manganese are necessarily made in electric furnaces in order to meet the commercial conditions. There seems to be a large and growing field for special alloy steels in castings. That branch of the steel foundry business has not been well looked after as yet, but the electric furnace readily permits foundrymen to make such special high strength or tool steel castings. The large steel corporations will probably use electric steel furnaces to make special alloy, tool or forging steels, but electric furnaces are not likely to replace immediately large open hearth furnaces for making rails or shapes where hot metal is available. The electric furnace is certainly going to do the work of the steel foundries, tool steel works, medium and small rolling mills for the production of special sicds, such as forging steels, wire steel, gun and armor steels. It is today not only the most modern, the cleanest and most certain and...
