

## MMD of Polydisperse Linear Polymers from Rheological Data

Filesize: 5.02 MB

### **Reviews**

*This is basically the finest publication i actually have go through till now. We have read and i also am confident that i am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*

## MMD OF POLYDISPERSE LINEAR POLYMERS FROM RHEOLOGICAL DATA

Condition: New. Publisher/Verlag: AV Akademikerverlag | IPP regularisation via heuristic modelling | The inversion of transfer coefficient functionals, such as viscoelastic moduli or viscosity, of dense polymeric liquids is associated with the solution of ill-posed problems resulting from the theory of polymer dynamics. A regularisation method based on a generalised, heuristic rheological model which ignores the thermodynamic properties and focuses on the dependence of inverse time is presented. This allows the calculation of the molecular mass distribution for rheologically simple liquids like e.g. polyethylene or polypropylene melts without any additional a priori information on the system. The provided method is successfully used with uni- and bimodal polymers for the purposes of quality assessment in polymer melt extrusion processes and degradation studies during processing. | Format: Paperback | Language/Sprache: english | 118 gr | 220x149x4 mm | 76 pp.
