Jack, a sort of crane for lifting heavy weights. It consists of small pinions worked with a common winch. The pinion works in the teeth of a large wheel, on whose axis there is fixed a small pinion with teeth working in a rack. By turning the pinion, the rack is raised, and with it any weight attached to it. - The word is also applied to several other diverse contrivances, especially to those which answer in the place of another hand or of an assistant: thus, it signifies a horse or wooden frame to saw timber on; a kitchen machine for turning a spit, the moving power being either a weight or the smoke and rarefied air of a chimney; an instrument for pulling off boots, etc. In sea-language, a Jack is a Hag of colors, displayed from a mast at the outer end of the bowsprit of a ship,...
