

## I Explore: A Science Textbook, 4

By Mrinalini Pradhan

Cambridge University Press, 2010. Softcover. Book Condition: New. I Explore is an eight-level series of textbooks in science for school students. As envisaged in the National Curriculum Framework (2005) guidelines, these books have been designed to present science as a living body of knowledge where students are encouraged and guided to make exploratory forays of their own. These books comprehensively deal with all the elementary aspects of science in a graded manner and help in forming basic ideas about nature and the immediate environment of a child. Key features ? Thematic and activity-oriented approach in a graded manner makes learning comprehensive ? Simple and clear style of presentation makes the understanding of concepts easy ? Warm Up activities at the beginning of each chapter activate prior knowledge ? Now you know in-text exercises help in reinforcing concepts learnt before moving on to the next section ? In-text Activities and Project Ideas foster skills of investigation and experimentation ? Multiple sections with HOTS questions and activities encourage creative and analytical thinking ? Sample test papers at the end of each book help in self-assessment ? Do you know? section provides interesting supplementary scientific facts and information ? Points to Remember summarises...

### Reviews

*The publication is great and fantastic. I actually have read through and i am sure that i am going to planning to go through yet again yet again down the road. I realized this pdf from my dad and i encouraged this publication to understand.*

*This is the finest publication we have read through right up until now. Better then never, though i am quite late in start reading this one. Its been written in an remarkably easy way in fact it is only after i finished reading through this book by which basically altered me, affect the way i think.*
