

A Voyage of Discovery, and Other Stories, Repr. from Peter Parleys Annuals

Filesize: 5.21 MB

Reviews

A whole new eBook with a brand new point of view. It is really simplistic but surprises in the fifty percent of the publication. I am just effortlessly can get a delight of looking at a written ebook.
(Mariano Gleichner)

A VOYAGE OF DISCOVERY, AND OTHER STORIES, REPR. FROM PETER PARLEYS ANNUALS

 A dark grey rectangular button with the word "DOWNLOAD" in white capital letters. To the right of the text is a white circular icon containing a black download symbol (a square with a downward-pointing arrow).

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Original publisher: Greenbelt, Md. : NASA Goddard Space Flight Center, 2000 OCLC Number: (OCoLC)82201783 Excerpt: . . . sphere. ight reflected from the reference without a sample and integrating sphere wall (transmitted ere mod without sample) was measured. hesamplemount was placed back into the integrating sph sample holder with the adaxial eedles surface facing toward the inside of the sphere. ight transmitted through the abaxial urfaces was measured. hesample was turned so that the abaxial needles surfaces of the sample were facing the inside of the sphere. hree additional easurement followed: 1) light transmitted through the adaxial eedles surfaces, 2) light reflected from the reference with the sample in place (abaxial reference), nd 3) light reflected from the abaxial eedles surfaces. After the entire suite of measurement was made, hesamplemount was removed from the int, with integrating sphere. heintended measured surface was painted with Testors (1149) black paint in care taken not to paint the other side of the sample element. hesamplemount was placed h the integrating sphere sample holder with the blackened surface facing away from the sphere. ig transmitted through the blackened sample was measured. After 20-Apr-1994: A modified set of procedures for optical property measurements described by Daughtry et al. (1989) was used. The sample mount was attached to a mask with an aperture the size of the illumination light source beam. This assembly was placed on the light table underneath an image analysis systems camera. The image was captured and the gap area measured by counting the number of whitish pixels. The area was ratioed to the total area of the incident beam (i. e., the area of the mask) to give the gap fraction (area of nonintercepted illumination beam). The sample was then placed in the integrating sphere sample holder and the suite of measurements, described above, was made. The measurement of the blackened sample was not made. Prior to 20-Apr-1994: To calculate the fraction of nonintercepted illumination beam, the painting technique. . . This item ships from La Vergne, TN. Paperback.
