

Railroad Gazette Volume 41

By Books Group

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .3-phase current to 1,100-volt 2-phase current, which is split up into two single-phase currents and used on the A. C. signal mains, one phase being run in each direction from the sub-station. At the end of each block section a step-down transformer, with two secondary coils, delivers current at about 12 volts for the track circuit and 50 and two dwarfs. The machine at Sixty-eighth street will control four switches, 13 signals and six dwarfs. We are indebted to Mr. William S. Twining, Chief Engineer of the Philadelphia Rapid Transit Co., for the information. Records of Fast Runs. The full page table of fast and unusual runs of steam locomotives published herewith is of the nature of an index to records which have been published in the Railroad Gazette during the past 26 years. It is a condensation and revision of the tables published in the...
