Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Qualitative Chemical Analysis and Laboratory Practice Part II. Treats of Qualitative Analysis; it is divided into five sections. In the first section the general preliminary operations of testing are described, such as the employment of flame reactions, the use of the Bunsen flame, the spectroscope, and so forth. The second section treats of systematic qualitative testing. The wet and dry reactions of each of the more commonly occurring bases and acids, inorganic and organic, are first described, after which a synopsis of analytical methods is given. The third section gives the special tests for the rarer elements, and shows where they may be expected, and how they may be separated, in the ordinary course of analysis. The fourth and fifth sections have been added mainly for the use of medical students. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
